RECREATION IMPROVEMENTS

## PINECREST LAKE RECREATION IMPROVEMENTS

Pacific Gas and Electric Company is working with the Stanislaus National Forest on upgrading Pinecrest Lake's facilities and infrastructure to enhance recreation, meet Americans with Disability Act accessibility and improve traffic and parking conditions.

Planned improvements to Pinecrest Lake's beaches, trails, bathrooms, campgrounds, parking lots and roads are designed to make your recreation experience more enjoyable and accessible. These upgrades will enhance access to Pinecrest Lake with better traffic circulation, parking, boat launch and dock facilities, fish cleaning station, trails and beach and swimming facilities. The expansion and modernization of public restrooms and the facilities for disabled visitors will improve barrier-free access to recreation resources, create new recreation opportunities and protect natural resources through minimizing water use and resource consumption.

### SCHEDULE FOR IMPROVEMENTS:

Improvement Construction is planned to occur September through May 2012–2015 in order to avoid the busy summer recreation season.

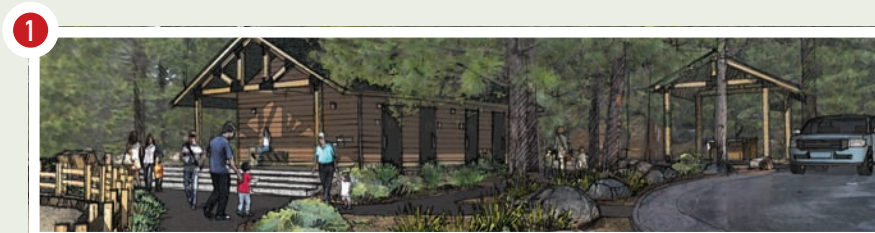

### VIEW ARTIST REPRESENTATIONS OF IMPROVED AREAS AROUND PINECREST LAKE:

Located in each of the key improvement areas you will find large sign boards are posted with more information and artist representations of the improvements in that area. Above is a map of where you can find the large sign boards around Pinecrest Lake.
